Professional Summary

IT professional with 8 years in the industry, including 4 years as a Salesforce Developer and 4 years as a Salesforce Solution Architect. Recently transitioned back to development, thriving on creating high-quality, reliable, and aesthetically pleasing code.

Work History

February 2024 – present, Self-Employment

Full Stack Developer, Remote

Developing [YoGato](#) - a full stack web application dedicated to yoga. The application will assist yoga instructors and experienced practitioners in creating and following through their sequences with ease. It features a smooth and fast user experience, voice announcements, and support for both desktop and mobile.

I implemented the project from start to finish, which includes designing the concept, developing the application, hosting it, and promoting it to the public. I took the roles of product owner, software developer, and QA throughout this project. This project demonstrates my ability to deliver consistently, to work independently, and solve unique problems on my own.

Skills and technologies:

- Front-end: Architected a React application using various features such as useState, useReducer, useEffect, useRef, useContext, and more.
- Back-end: Architected a Node.js application following MVC pattern.
- Database: Worked with MongoDB and Mongoose for data modeling and storage.
- Hosting: Hosted the application using Adaptable.io and Netlify.

Libraries and tools:

- DND Kit
- uuid
- hamburger-react
- react-click
- react-use-precision-timer

- Axios
- date-fns
- Passportjs
- Web Audio API
- Lodash
- MongooseJs

June 2023 – January 2024, Professional Development

I used this time to update my knowledge on modern programming languages and frameworks for transitioning into the full-stack programmer role, including: Javascript, TypeScript, React, NodeJs/ExpressJs/MongooseJs stack, Tailwind CSS, MongoDB, and to update my knowledge foundational programming concepts, data structures and algorithms, and to practice LeetCode problems.
